Older 3G wireless Internet technology delivered slow Internet speeds in comparison to traditional DSL and cable Internet connections. However, today's wireless Internet technology including 4G LTE delivers mobile broadband speeds equivalent and even faster than DSL and cable.

Free Wireless Internet & Phone Service. Cheap Internet ...

It's tough to avoid the fact that Verizon has a hold on the mobile hotspot market — their MiFi hotspots are trusted sources of internet on the go. But, their top-tier models have gotten a little expensive for their reliability, so our nod here goes to their Jetpack line, specifically the 900L as it offers good, prepaid service for less.

What is Wireless LAN? What is WLAN? | Field Engineer

Wireless home networks transmit signals in a narrow radiofrequency range around 2.4 GHz, and it's common for devices on the same frequency to affect the wireless signal and slow down an internet connection. Electronics such as cordless phones, garage door openers, baby monitors, and microwave ovens may use this frequency range.
