twentieth century that have made the issue of work-family conflict salient to employers, employees, and policymakers.

Work Overload, Parental Demand, Perceived Organizational ...  
Work-family conflict occurs when an individual experiences incompatible demands between work and family roles, causing participation in both roles to become more difficult. This imbalance creates conflict at the work-life interface. It is important for organizations and individuals to understand the implications linked to work-family conflict.

Antecedents of work-family conflict: A meta-analytic ...  
Family-work conflict (FWC) is also a type of inter-role conflict in which family and work responsibilities are not compatible. Previous research suggests that FWC is more likely to exert its negative influences in the home domain, resulting in lower life satisfaction and greater internal conflict within the family unit.
