If this is XHTML 1.x or an HTML5 polyglot document served as XML, you should also use the xml:lang attribute (with the same value). If your page is only served as XML, just use the xml:lang attribute.. Do not use the meta element with http-equiv set to Content-Language.. Choose tags from the IANA Subtag Registry, and follow the syntax rules in BCP 47 when using more than just a language subtag.
