Futures for Partitioning in Physical Design

Abstract. In this paper, we present EMPAR, an interactive synthesis environment for hardware emulations. EM-PAR provides an open-ended design environment for the development of hardware emulators, which is ca-pable of supporting: (1) a variety of EM architectures (2) a variety of EM synthesis algorithms, (3) interac-tive control by the user, and (4) design quality anal-ysis.

ysis. Introduction The design and synthesis of novel polycyclic receptor architec-ture is of fundamental importance, since model recognition studies contribute to much better understanding of complex bio-logical systems [1]. Herein, we report the design, computational anal ysis and synthesis of four novel nucleoside-amino acid conjugates 1a, 2a 3 and 4 (Figure 2) conveniently coupled via CuAAC, positioning a 1,2,3-triazole group in the center of the molecule, linking the nucleoside and amino acid. We chose to use amino acids because their properties can be easily ...

Analysis Vs Synthesis Analysis is like the process of deduction wherein you cut down a bigger concept into smaller ones. As such, analysis breaks down complex ideas into smaller fragmented concepts so as to come up with an improved understanding. Synthesis, on the other hand, resolves a conflict set between an antithesis and a thesis [...]
