Solubility and Factors Affecting Solubility - Chemistry ...
In chemistry, an ionic compound is a chemical compound composed of ions held together by electrostatic forces termed ionic bonding.The compound is neutral overall, but consists of positively charged ions called cations and negatively charged ions called anions.These can be simple ions such as the sodium (Na +) and chloride (Cl –) in sodium chloride, or polyatomic species such as the ammonium ...

Homework Help and Textbook Solutions | bartleby
Solubility is defined as the upper limit of solute that can be dissolved in a given amount of solvent at equilibrium. In such an equilibrium, Le Chatelier's principle can be used to explain most of the main factors that affect solubility. Le Ch â telier's principle dictates that the effect of a stress upon a system in chemical equilibrium can be predicted in that the system tends to shift in ...
